Experience

- **IOHK** — London, UK
  Senior Software Engineer – Hydra Team — *July 2025 – Present*
  - **Hydra Protocol Development**: Design and implement core features of the Hydra Head protocol in Haskell, including smart contracts in Plutus and Aiken.
  - **Specifications & Research**: Contribute to formal protocol specifications and produce documentation to support correctness, auditability, and adoption.
  - **Infrastructure & Tooling**: Enhance CI/CD, developer workflows, and community-facing tooling to improve reliability and usability.
- **Proda** — London, UK
  Senior Fullstack Software Engineer — *February 2024 – July 2025*
  - **Fullstack Development**: Lead development on both backend (Haskell) and frontend (TypeScript, React, Elm) components of the platform, enabling users to efficiently manage rent roll data.
  - **Feature Architecture**: Architect and implement critical features, ensuring they align with client needs and platform goals.
  - **BE-FE Integration**: Spearheaded the integration of OpenAPI specs, enhancing backend-frontend communication and reducing integration issues.
  - **CI Optimization**: Optimized CI pipeline, reducing runtime by 30%, which improved development efficiency and lowered costs.
  - **Cross-Functional Collaboration**: Work closely with product, design, and engineering teams to align on roadmap, contribute to user stories, and ensure seamless feature delivery.
- **Lantern Ventures** — London, UK
  Senior Software Engineer — *September 2022 – February 2024*
  - **Backend - Haskell - AWS - PostgreSQL**: Working on maintaining, testing and adding new features to the backend of the trading platform
- **Heliax** — London, UK
  Senior Software Engineer [Contract] — *April 2023 – July 2023*
  - **Haskell - Rust - TypeScript - Compilers - Blockchain**: Compiler for the Juvix functional programming language with static typing and strict semantics with a focus on referential transparency. Intended to be used as a DSL for smart contract writing
  - **TypeScript - VSCode**: VSCode extension for the Juvix language with the semantic highlighting, go-to definition, documentation, tokenization, etc.
  - **Developer Advocate**: Creating blog posts, giving presentations, building a community around the language
- **Standard Chartered** — London, UK
  Quantitative software engineer — *February 2021 – August 2022*
  - **Haskell - PostgreSQL - Backend**: Developing and maintaining an internal XML parsing system, including implementing necessary parsers to support new communication schema/schema changes
  - **Testing**: Integrating testing platform for asynchronous actions into the project
- **Riskbook** — London, UK
  Software engineer [Contract] — *August 2020 – October 2020*
  - **Backend - Haskell - Elm - Typescript - PostgreSQL** : Maintaining leading reinsurance industry placement platform, implementing backend features end-to-end. Working on the frontend in Elm. Improving code practices, introducing more team code sessions, and knowledge-sharing opportunities.
- **Habito** — London, UK
  Software engineer — *December 2019 – September 2020*
  - **Backend & Architecture - Haskell - PureScript - PostgreSQL** : Owning and being responsible for delivering the Life Insurance product end to end, including technical and architecture discussions
- **Holmusk** — Singapore
  Software Engineer — *May 2018 – Nov 2019*
  - **Backend - Haskell - PostgreSQL - Protobuffer** : End-to-end development and delivery of the research project for healthcare study in Type 2 Diabetes
  - **Frontend - Elm - CSS** : Building a fast and responsive frontend of two client-facing applications

- **Infrastructure - Circle CI - Docker - AWS** : End-to-end development and delivery of the research project for healthcare study in Type 2 Diabetes

- **Serokell** — Saint Petersburg, Russia
  Software engineer — *Nov 2017 – April 2018*
  - **Backend - Distributed systems - Haskell**: Distributed cryptocurrencies implementation, logging infrastructure enhancements, internal toolings development
- **Aelve** — Saint Petersburg, Russia
  Junior Haskell Developer — *Jul 2017 – Oct 2017*
  - **Backend - Haskell - acid-state**: Working on "Guide" project — a wiki-like site for documenting the Haskell ecosystem

Open Source Contributions

- **Kowainik** — online
  Co-founder and Mentor — *March 2018 – Present*
  - **Create, maintain, mentor - Haskell, Idris, Elm**: Maintain Haskell libraries and applications, creating useful tools and libraries for the Haskell ecosystem, write educational and experience blog posts, mentoring people in Haskell.
  - **Bind the gap**: Created a monthly magazine about Haskell and Functional Programming
  - **Learn4Haskell**: Develop and lead a GitHub-located course that will get users into the FP
- **Google Summer of Code** — online
  Mentor — *May/2019 – Aug/2019*
  - **Web application - Haskell - PostgreSQL - Elm**: Plan and mentor the web application project at Google Summer of Code program

Education

- **Polkadot Blockchain Academy** — Bali, Indonesia
  Protocol Engineering Track – Graduated with Distinction — *July 2025*
  - **3-week intensive program**: Focused on protocol engineering, blockchain consensus, and cryptography.
  - **Rust Development**: Hands-on development in Rust for Substrate and Polkadot ecosystem.
- **ITMO University** — Saint Petersburg, Russia
  Master of Science in Computer Science — *Sept 2016 – Sept 2018*
- **Lomonosov Moscow State University** — Baku and Moscow, Azerbaijan and Russia
  Bachelor of Science in Applied Mathematics; Distinction — *Sept 2010 – Sept 2014*

Conference Guest Speaker

- **Not My Type – talk at DevFest UK & Ireland 2022** — London, UK
  Guest Speaker — *January 2022*
- **Not My Type – talk at Haskell eXchange 2021** — London, UK
  Guest Speaker — *November 2021*
- **Learning Functional Programming – talk at WomenTech Global Conference 2021** — London, UK
  Guest Speaker — *March 2021*
- **Lift Unliftable (and unlift liftable) – talk at ZüriHac 2021** — Zurich, Switzerland
  Guest Speaker — *June 2021*
- **Totality – talk at Functional Fest 2021** — online
  Guest Speaker — *April 2021*
- **Haskell LOL – talk at Haskell Love conference 2021** — online
  Guest Speaker — *September 2021*
- **Learning Functional Programming – talk at Tech(K)nowDay 2021** — online
  Guest Speaker — *March 2021*
- **Stan – Haskell Static Analyser – talk at Haskell Love conference 2020** — London, UK
  Guest Speaker — *August 2020*
- **Open source in Haskell – discussion at Immutable Conversations** — London, UK
  Guest speaker — *December 2020*

Additional information

- **Tech**: Haskell, Rust, Elm, Purescript, React, TypeScript, REST Api, GraphQL, SQL, NoSQL, Git, Docker, Agile, Scrum
- **Interests**: Self-development reader, powerlifter, former ballroom dancer, pianist
